Contractor

*Iraq and Afghanistan

Date: 2008 – 2012

Sector: Government and Military

Region: International: UK, Germany, UAE, Afghanistan

Expertise Used: Freight Forwarding
Time Critical

Challenge: On-time delivery of life saving mine rolling devices

Solution: Set up of air bridge operation from multiple airports in Europe to 3 air hubs in Afghanistan (Bagram, Kandahar, Leatherneck)
Prepositioned assets at airfields for immediate delivery of these vital life saving devices to remote locations

Move One successfully undertook a contract to transport over 13 million kgs of mine rollers from Germany to Afghanistan via the U.A.E. Mine rollers are demining devices that are mounted on the front of tanks and designed to detonate mines by rolling over them and absorbing the explosion. These devices were delivered door-to-door with a secure convoy from origin to destination. Move One booked the air freight, handled the air craft on arrival, and distributed the mine rollers to FOBs throughout Afghanistan.
